Espoma Organic® Evergreen-tone™ 4-3-4 GUARANTEED ANALYSIS

Total Nitrogen (N).....4.0%	ALSO CONTAINS NON PLANT FOOD INGREDIENTS
0.3% Ammoniacal Nitrogen	Contains a total of 6,000,000 Colony Forming Units (CFU) per gram of the following species:
1.2% Other Water Soluble Nitrogen	Bacillus amyloliquefaciens 1,000,000 CFU/gram
2.5% Water Insoluble Nitrogen*	Bacillus licheniformis 1,000,000 CFU/gram
Available Phosphate (P ₂ O ₅).....3.0%	Bacillus megaterium 1,000,000 CFU/gram
Soluble Potash (K ₂ O).....4.0%	Bacillus pumilus 1,000,000 CFU/gram
Calcium (Ca).....5.0%	Bacillus subtilis 1,000,000 CFU/gram
Magnesium (Mg).....1.0%	Paenibacillus polymyxa 1,000,000 CFU/gram
0.7% Water Soluble Magnesium (Mg)	
Sulfur (S).....5.0%	1% Humic Acids derived from Leonardite

Derived from: Feather Meal, Poultry Manure, Bone Meal, Alfalfa Meal, Greensand, Sulfate of Potash, Sulfate of Potash Magnesia and Elemental Sulfur.

*Contains 2.5% Slow Release Nitrogen

Directions

1 lb. = 3 Cups

We recommend wearing gardening gloves when feeding your plants.

NOTE: Many Evergreen varieties have shallow roots that can be damaged if you cultivate too close to them.

New Plantings

Dig a hole twice as wide and the same depth as the root ball so that roots can spread naturally. Remove ½ of the soil and replace it with compost, peat moss or Espoma Organic Garden Soil. Mix 1 cup of Evergreen-tone® into amended soil. Place the plant in the hole so that it sits at the same depth it was previously growing.

Established Plants

Feed twice per year- Spring and Fall. Use half the rate in the Fall. If the area is mulched, either temporarily remove the mulch and feed, or feed at double the rate on top of the mulch. Water thoroughly.

Shrubs:

Rate: 1 cup per foot of drip line diameter; double rate if diameter is larger than 3 feet. Sprinkle around the drip line of the plant. Water thoroughly.

Trees:

Rate: 1 lb. (3 cups) per inch of trunk diameter. Triple for diameters 3 inches and larger. Dig 3 inch wide holes around the drip line that are 12-18 inches deep and 2-3 feet apart. Divide the Evergreen-tone evenly and pour into the holes. Backfill the holes with soil. Water thoroughly.

Garden Beds

New Beds:

Mix 10 lbs. (30 cups) of Evergreen-tone per 100 square feet into the top 4 inches of soil.

Established Beds:

Apply 5 lbs. (15 cups) per 100 square feet. Sprinkle evenly over area and water thoroughly.

Potted Plants

New Plants:

When preparing soil for new plants, mix 2 cups of Evergreen-tone per cubic foot of soil (1.5 tbsp. per quart).

Established Plants:

Sprinkle 1 tsp. of Evergreen-tone for every 3 inches of pot diameter into the soil along the outer edge of the pot. Water thoroughly.
